Name: _Key_

4th Grade Notes 5.1 Multiply by Tens (Shortcut) p. 279

If there is a zero in the ones place in the second factor, you can

multiply the second line: put down the __zero__ and multiply

the __tens__. *(This is a shortcut and you need to do it*

whenever you can.)

Ex: 25
     x10
   ‾‾‾‾
      00
  + 2 5 0
  ‾‾‾‾‾‾‾
    2 5 0

      ⁴45
     x90
   ‾‾‾‾
   4,050

     2⁵5
  x 1 0
  ‾‾‾‾‾‾
   2 5 0 ← answer
            only
         (2nd line)
