Independent Practice

Divide.

2. $2 \overline{)418}$

3. $2 \overline{)210}$

4. $4 \overline{)4,324}$

5. $6 \overline{)782}$

6. $2 \overline{)6,213}$

7. $3 \overline{)6,192}$

8. $840 \div 7 =$ _____

9. $627 \div 3 =$ _____

10. $5,330 \div 5 =$ _____

11. $8,017 \div 9 =$ _____

12. $413 \div 4 =$ _____

13. $9,163 \div 3 =$ _____

Problem Solving

14. **Mathematical PRACTICE 2** **Use Algebra** There are 312 fish at the aquarium in 3 different fish tanks. Each tank has the same number of fish. How many fish are in each tank? Write an equation to find the unknown. Then find the unknown.

15. There are 1,620 minutes of music to be put on 9 CDs. If the same number of minutes fits on each CD, how many minutes of music fit on each CD?

16. Gina spent 120 minutes helping her neighbors rake leaves in the last 4 days. She helped the same amount of minutes each day. How many minutes did she rake leaves each day?

HOT Problems

17. **Mathematical PRACTICE 1** **Keep Trying** Write two division problems that have zeros in the quotient. One of the problems should have a remainder and the other should not.

18. **?** **Building on the Essential Question** How can I know when to place a zero in the quotient?
